

FosterClub Publications: supporting young children and teens when they are placed in foster care

This project was sponsored by the CJA Taskforce/Foster Care Subcommittee and was a collaborative effort between its members, FosterClub and some very special young people who helped with the development of the coloring book and guide. FosterClub is the national network of young people in foster care. Their mission is to improve life for young people in foster care through a national network that is built for youth, powered by youth, and changing life in foster care. The FosterClub retains the Copyright on both publications (both publications: ISBN9780979116247).

The workbooks are designed to support young kids and teens through being removed from their home by explaining the basics of foster care, introducing them to people with whom they will interact, helping them identify their own needs and wishes, and by validating their concerns by showing them that other kids often share the same feelings.
